**Steven Gunberg, D.O. • Felipe Espinoza, M.D. • Christopher Hancock, M.D. • Adam Brochert, M.D.**

**Adam Brochert, M.D.**  
**PROFESSIONAL BACKGROUND**

Dr. Brochert graduated valedictorian from Ross University School of Medicine. Following medical school, he trained in diagnostic radiology at Memorial Health University Medical Center in Savannah, GA. Dr. Brochert subsequently completed mini-fellowships in cardiac imaging, CT colonography and MRI with world renowned imagers in these fields.

While in residency, Dr. Brochert obtained an MBA from Georgia Southern University. He was awarded the Radiology Teacher of the Year award by radiology residents during his first post-training year in Savannah, GA at Memorial Health University Medical Center.

Shortly after starting the first regional cardiac CT program in Savannah, GA, Dr. Brochert moved to Southern California to be near family and joined the staff at Eisenhower Medical Center in Rancho Mirage. With oversight for outpatient imaging, his expertise in oncologic imaging (including cutting edge PET, CT and MRI of all types of cancers and tumors) led him to the successful multi-specialty integration of advanced radiological services throughout the Coachella Valley.

In addition to publishing multiple scientific papers and being involved in medical imaging research, Dr. Brochert has also authored many books and articles in the field of medical education. He brings his passion for oncology imaging to Desert Medical Imaging, hoping to enhance the quality of radiologic care for oncology patients in the Coachella Valley.
